CONCLUSION:

By implementing the Do Connect project with five modules through this project, we want to make it easier for users to have all of their inquiries about various topics and domains answered. Finally, we are drawing the conclusion that the learner will find it useful to clarify their questions from various fields for various users and by their thoughts.

Several white lines of varying lengths and orientations are positioned in the bottom right corner of the slide, creating a modern, abstract graphic element.

SCOPE OF PROJECT:

The main aim of Do-connect project to help the user to the all answers which was posted by him are other and also user can able to post the question and answer for the other users questions. In this project we have implemented chat model to chat with other who are using the Do-connect website.

Several white lines of varying lengths and orientations are positioned in the bottom right corner of the slide, creating a modern, abstract graphic element.

Thank You
